EDUCATION

B.Tech. in Cybersecurity (First Class Honours) | 2025

Federal University of Technology,
Minna, Niger State

SKILLS

Offensive Security

- Penetration Testing
- Vulnerability Assessment
- Web Application Security
- Threat Modeling

Security Tools

- Burp Suite
- Metasploit
- Wireshark
- Nmap
- Kali Linux

Programming

- Python
- JavaScript
- Django
- Backend Development

Cloud & IAM

- Access Control
- Authentication
- Identity Management
- Security Architecture

ACHIEVEMENTS

- Served as Class Representative throughout my undergraduate days
- Mentored 20+ local and international students in technical research and data analysis
- Top 1% hacker on TryHackMe (hands-on penetration testing and cyber range labs)

PROFILE

A First-Class Cybersecurity graduate with over three years of hands-on experience in vulnerability assessment, secure software development, and threat detection. Skilled in designing and implementing AI-driven security systems, intrusion detection solutions, and secure web applications. Strong foundation in penetration testing, malware analysis, and network security, with practical experience using tools such as Burp Suite, Metasploit, Wireshark, and Nmap. Demonstrates a strong interest in cloud security, identity protection, and compliance within enterprise environments.

3+ yrs Experience	First Class Cybersecurity Graduate	20+ Research Students Mentored

EXPERIENCE

Cybersecurity & Performance Analyst (Intern)

May 2024 – July 2025

Financial & Business Advisory Associates Lagos, Nigeria

- Conducted vulnerability assessments and security testing on enterprise applications, including Perfraka Software
- Monitored IT infrastructure and performed security health checks across client environments
- Supported identification and mitigation of system vulnerabilities in production systems
- Collaborated with development teams to improve application security and performance.

Software Engineering Intern

Feb 2021 - Sept 2022

Bugfix Technologies Minna, Nigeria

- Collaborated in the development of a secure web application components for a post-UTME system with integrated access controls
- Performed debugging, testing, and vulnerability identification prior to deployment
- Applied secure coding practices to reduce common web vulnerabilities

CERTIFICATIONS

Software Engineer, ALX Africa	(CERT-ID GJCs57YHre)
Certified Certified Network Security Practitioner (CNSP), SecOps	(CERT-ID 10876200)
Certified Application Security Practitioner, SecOps	(CERT-ID 8279701)

TECHNICAL PROJECTS

AI-Based Antivirus System

- Built an AI-powered malware detection system using machine learning and heuristic analysis.
- Achieved 97.5% detection accuracy with a 2.5% false positive rate

IoT Botnet Catcher (IDS/IPS)

- Developed an IoT intrusion detection and prevention system using Scapy.
- Implemented real-time anomaly detection and automated threat mitigation.
